

LACQUERED AND OILED PARQUET FLOOR

The main features, which perfectly characterize Floor Royal parquet.

- 1. Ready for laying** – Parquet is already covered with six coats of UV varnish/3 coats of oil. After installation there is no need to grind, polish or varnish!
- 2. Practical size** – parquet floor pieces have the same sizes as classical parquet floor pieces, thereby unlike typical three-layer panels, where all pieces are placed in one direction (so called English pattern), Floor Royal can be laid in any pattern, selected by client (herringbone, squares, English, parallel, etc.)
- 3. Ideal** – Floor Royal is made according to state-of-the-art technology to manufacture parquet flooring, resulting in no visible joints between pieces after applying and end result is perfectly even floor surface. Six-layer varnish is mechanically applied and hardened with UV technology, which results in ideal structure, which cannot be obtained by lacquering in home conditions!
- 4. Natural** – Floor Royal is product, which 100% consists of natural wood!
- 5. Renewable** – Worn parquet layers is intended for renewal several times.
- 6. Universal** – Parquet floor can be laid in one level with ceramic tiles due to thickness of Floor Royal, which comprises 11mm, this thickness gives opportunity to install underfloor heating under parquet.
- 7. Various** – Wide range of brands, wooden colours, which will satisfy wishes of each customer!
